

Kettle Taps

Four (4) water options ▼

Boiling • Chilled • Sparkling • Ambient

newport

what is Qettle?

A Qettle Tap is a truly remarkable tap! It can dispense up to four flows of water - your two existing water options **plus** two **filtered** options: **100°C boiling water, chilled, sparkling and/or ambient water.**

It comes as a complete system with all the extras installed under the counter giving you a sleek modern finish above counter.

Imagine simplifying so many of your kitchen tasks by just the turn of a knob!
Make an instant cup of coffee or tea or prepare speedy snacks and clean up.

Buying and storing expensive bottled water will become a thing of the past.
Jug filters will be a distant memory, and even better, you won't be contributing to the plastic waste generated by the bottled water industry.

a complete *system*

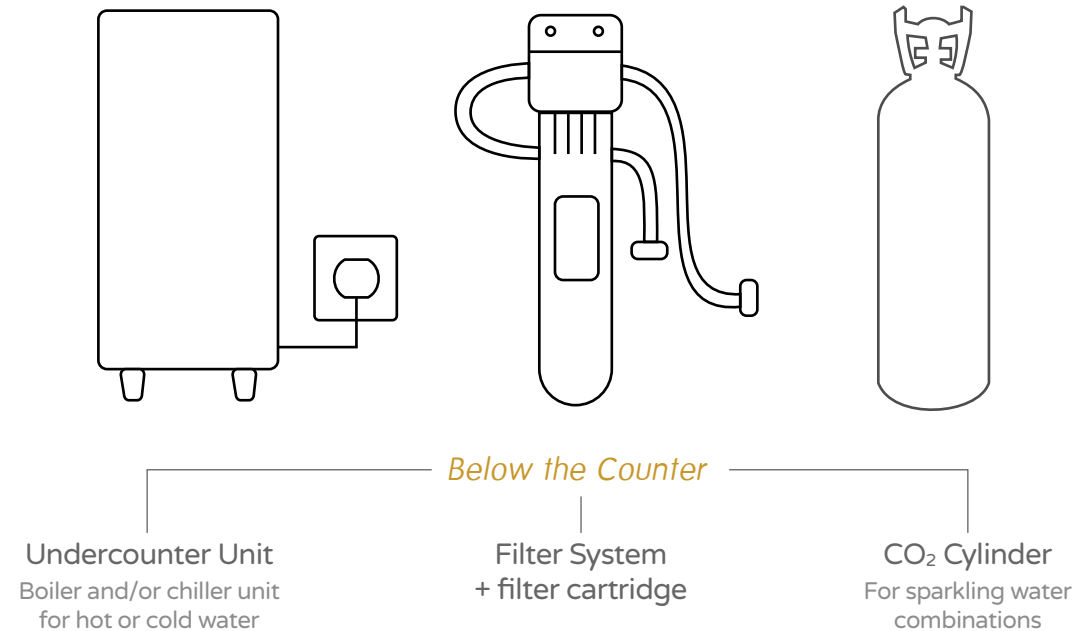

what you get • what you'll need

what you get

Whether you choose to purchase our Qettle system or sign up for our all inclusive subscription package (see page 19) we provide you with a complete system to meet all your needs.

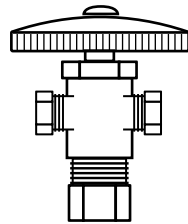

According to your water combination selection;

Boiling & ambient, Chilled & ambient, Sparkling & ambient, Chilled & Sparkling, Boiling & Chilled or Boiling & Sparkling;
your below the counter set up may look a bit different, but this is your basic setup:

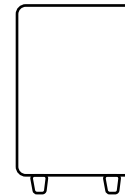

what you'll need

We're here to help you and installing a Qettle tap is not as hard as it may seem. Here are a few things you'll need, some of which you may have already.

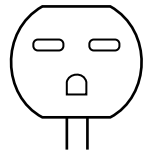

Connection to a
Mains water supply.

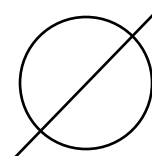

Space for a double or single
undercounter unit* needed
under the sink.

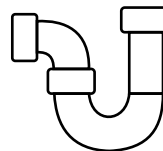

Our largest unit is 240mm D x 398mm W x 420mm H

Standard 220V 13 amp socket/s* to
plug in your undercounter unit/s.
** In some cases two sockets may be needed.*

A 35mm diameter hole for your
Qettle tap and 100mm clearance
behind your tap and the back of
your sink, windowsill, upstand or
splashback.

An under sink waste pipe
already in place.

* Two units are required for combinations 5 and 6:
Boiling & Chilled and Boiling & Sparkling.
In these cases (2) 220V 13 amp sockets are required.

Simple right? If not, don't worry...

We have skilled and certified technicians standing by to assist and install your new Qettle!

your choice... purchase or subscribe

Our taps are available for purchase but we're also passionate about saving our clients the hassle of maintenance and we LOVE long-term partnerships, so we've developed a cost-effective solution.

our all-inclusive subscription package

We've simplified your life by offering a low cost subscription fee which is deducted monthly from your credit card. It includes servicing, maintenance, break/fix service calls, filtration changes and much more. These services are managed via software and are carried out by our team of dedicated technicians. Replacement CO₂ cylinders for sparkling water combinations are not included in pricing. Initial cylinder is provided.

reviews

what our customers say

“The Qettle is just the perfect fit for our breakfast bar! ~ I love how we don’t have our clumsy electric tea kettle sitting on the counter anymore, but most importantly the water is ready to steep a desperately needed cup of tea with a safe yet friendly twist of a knob.”

- Sarah Emtage

“My boiling & ambient copper Qettle is the best thing I’ve ever gotten. I’m sure I overuse mine since it’s used on average 20 times a day for everything from...instantly sanitizing my baby bottles and soothers, quickly cleaning greasy/sticky pans, making copious amounts of tea and so much more. Every kitchen or bar needs one. Sleek and stylish. Thank you Newport.”

- Kim deCasseres

“Thank you Newport for introducing my family and I to what I say is one of the best innovations for a home! The Qettle tap - instant boiling and filtered water!!!

Imagine:

1. Cups of tea
 2. Greasy or burnt dishes sparkling clean
 3. Filtered water
 4. Hot sud for my floors and aprons
- All in an instant from my kitchen tap!

10 stars to service and all.”

- Judy Francis

our promise

Our promise is pure, refreshing
drinking water - minus the plastic bottles:

No more storing and lifting heavy water bottles
No more running out of water
